UniHub

Testing Guide - on your phone
App version 0.2.14

Every test is a short list of taps with what you should see. Tick **OK** or **Problem** under each one. When you find a problem, write one line about it and send me the list (a screenshot helps a lot).

Part	What it covers	Time
1	Install the app and get ready	10 min
2	Signing up and signing in	15 min + 25 min wait
3	The student side: feed, event page, tickets	25 min
4	Becoming an organizer and creating events	20 min
5	Notifications	15 min + waiting
6	After the event: past tickets, reviews, statistics	20 min
7	Admin tools	20 min
8	Profile, looks and deleting an account	15 min
9	If something goes wrong	as needed

> **Note:** Words in `this style` are things you type exactly. Words in **bold** are buttons or tabs you tap.

Part 1 - Install the app and get ready

1A. Install the newest version

The newest app file is `D:\UniHub_APK\UniHub-v0.2.14.apk`. Ignore the older files in that folder.

1. Copy the file to your phone: USB cable (choose **File transfer** on the phone, copy it into **Download**) or Google Drive. Do not email it: Gmail blocks .apk files.
2. On the phone open the **Files** app > **Downloads** and tap the file.
3. If Android asks, allow installing from this source. If Play Protect warns you, tap **More details** > **Install anyway** (it does that for every app that is not from the Play Store).
4. Tap **Install**. It updates the old UniHub and keeps you signed in. Only if it says *App not installed*: uninstall the old UniHub first, then install again.

1B. The accounts in this guide

You play several people on one phone by signing out and in again. Gmail ignores everything between **+** and @, so all codes for the + addresses arrive in your normal inbox.

Name in this guide	Email	Who it is
Admin	who649@haw-hamburg.de	You, the platform admin (exists already)
Test Student	whp2718+student@gmail.com	A normal user, created in Test 1
Student 2	whp2718+student2@gmail.com	A second normal user, for the waitlist (Test 17)
Throwaway	whp2718+gone1@gmail.com, +gone2 ...	Short-lived accounts for delete/remove tests

Tip: Write the passwords on paper. To **sign out**: tap your name at the top right > **Sign out**. To **sign in**: tap **Sign in / Sign up**, type email and password.

Note: Some tests need a **second phone** (a friend's) or a **computer screen**. They say so at the top. Skip them if you can't do them now.

Part 2 - Signing up and signing in

Test 1 - Create the Test Student account

1. Sign out. Tap **Sign in / Sign up** > **New here? Create an account**.
2. Name `Test Student`, email `whp2718+student@gmail.com`, a password of 8+ characters.
3. Under the email it says *No university email detected* (correct for Gmail). Tap **Create account**.
4. Check the screen **Check your email**: it has one box, **Code from your email**, and a grey note that you have **20 minutes**.
5. Type the 6-digit code from Gmail and tap **Verify**.

You should see: you are signed in; the bottom bar shows **Home**, **My Tickets**, **Profile**.

☐ OK ☐ Problem, what happened: _____

Test 2 - Unfinished sign-ups free the email again (needs a 25-minute wait)

1. Sign out. Start a sign-up with `whp2718+ghost@gmail.com`, but **do not** type the code. Close the app.
2. Do other tests for **25 minutes**. (The server deletes sign-ups whose code was never entered after 20 minutes.)
3. Sign up again with exactly the same email and any password.
4. A **new** code email arrives. Type it in.

You should see: the second sign-up works normally and you are signed in. Before this fix the email was stuck forever.

☐ OK ☐ Problem, what happened: _____

Test 3 - Coming back before the 20 minutes are up

1. Sign out. Start a sign-up with `whp2718+back@gmail.com` and close the app without the code.
2. Within 20 minutes open the app and **sign in** with that email and password.

You should see: the app sends a new code and opens the code screen by itself. Type it: you are in.

☐ OK ☐ Problem, what happened: _____

Test 4 - Forgot password

1. Sign out. Tap **Sign in / Sign up** > **Forgot password?**
2. Type `whp2718+student@gmail.com` and tap **Send code**.
3. Type the code from Gmail and a new password. Confirm.

You should see: you are signed in with the new password. (Write it down!)

☐ OK ☐ Problem, what happened: _____

Test 5 - Wrong password and too many codes

1. Sign out and sign in as Test Student with a wrong password.
2. On the code screen of any sign-up, tap **Resend code** twice quickly.

You should see: *Wrong email or password* for the first; for the second a message asks you to **wait a minute** before asking for another code.

☐ OK ☐ Problem, what happened: _____

Part 3 - The student side

Sign in as **Test Student** for this part unless a test says otherwise.

Test 6 - The home feed

1. Open **Home**. While it loads you briefly see grey pulsing cards (on a fast connection it is very short).
2. At the top it greets you: **Hi Test**. Below: category chips, one big featured event, then **Coming up** with smaller rows.
3. The cards fade in one after another. Press a card: it shrinks a little under your finger.
4. Swipe the chip row left and tap **Other**: a list **More categories** opens. Tap **All** to go back.
5. Tap the **magnifying glass**, type part of an event name. Then type `zzz`.

You should see: matching events stay; for zzz a drawn picture with *No events match your search*. Tap **X** to close.

☐ OK ☐ Problem, what happened: _____

Test 7 - Saving events (heart)

1. Tap the **heart** on an event picture. Your phone gives a tiny vibration; the heart turns red.
2. Tap the **heart at the top** (next to the magnifying glass): only saved events show.
3. Close the app completely, open it again.

You should see: the heart is still red (it is saved online). Tap the top heart again to see everything.

☐ OK ☐ Problem, what happened: _____

Test 8 - The event page

1. Open any upcoming event.
2. Check: date and place in small tiles, the organizer under **Hosted by**, a seat bar like *3 of 50 seats taken* (only for events with a limit).
3. Tap the poster (or the arrows icon): the whole poster shows on black. Pinch to zoom, **X** to close.
4. Tap **Add to calendar**: your calendar app opens with the event filled in. Go back without saving.
5. If the event has **Contact & links**, tap each one: browser, mail app, phone dialer.

You should see: everything is readable in light and dark mode, nothing overlaps.

☐ OK ☐ Problem, what happened: _____

Test 9 - Register: confetti, ticket and bright QR code

1. On an event that is **not** yours, tap **Register** at the bottom.
2. Watch: confetti, a short vibration and the button turns into **Registered** with a tick.
3. Open **My Tickets**. The ticket has a coloured header, the date and place, and a QR code.
4. Tap the **QR code**.

You should see: it opens full screen on white and the screen goes to **full brightness**. Close it with **X**: the brightness goes back to what it was.

☐ OK ☐ Problem, what happened: _____

Test 10 - Cancel a registration

1. In **My Tickets** tap **Cancel registration** on that ticket > **Yes, cancel**.

You should see: *Registration cancelled.* The ticket disappears. The event shows **Register** again.

☐ OK ☐ Problem, what happened: _____

Register again for that event before you continue - the next parts use it.

Part 4 - Becoming an organizer and creating events

Test 11 - Apply to become an organizer

1. As **Test Student**: **Profile** > **Become an organizer**.
2. Tap **Send request** straight away: red messages ask for position, phone and the tick box.
3. Fill in club name `Test Events Club`, position `Chair`, phone `+49 40 1234567`.
4. Tap **Add document** and pick a photo or PDF (max 5 MB).
5. Tick the box and tap **Send request**.

You should see: *Request sent*; the Profile card says your request is waiting for review.

☐ OK ☐ Problem, what happened: _____

Test 12 - Admin approves

1. Sign out, sign in as **Admin** > **Admin** tab > **Requests**.
2. Check the request: position, phone (tap = dialer), email, and a chip **Document 1** (tap = opens it).
3. Tap **Approve**.
4. Sign out, sign in as **Test Student** > **Profile** > **Check status**.

You should see: Test Student's bottom bar changes to **Dashboard**, **Create Event**, **Scanner**, **Profile**. In the Admin's Requests list the card now says documents were deleted.

☐ OK ☐ Problem, what happened: _____

Test 13 - Create an event with everything

1. As **Test Student** (now an organizer): **Create Event**.
2. Add a poster with **Add poster image**. Title `Big Test Event`, location `Room 1`.
3. Set **Starts** to **2 days from now**. Turn off **No attendee limit** and set the capacity to `20`.
4. Check that the switch **Free unconfirmed seats** appears (it only shows when there is a seat limit). Leave it off.
5. Categories: tap **Other** and type `Yoga` in **Your own category**.
6. Fill **Contact & links**: website `www.haw-hamburg.de`, an email, a phone.
7. Choose **Public event** and tap **Publish Event**.

You should see: *Event published.* It appears on the Dashboard. Watch the **Live Preview** update while you type.

☐ OK ☐ Problem, what happened: _____

Test 14 - Edit an event and see 'Your event'

1. **Dashboard** > the **pencil** on Big Test Event. Change the title to `Big Test Event 2` > **Save changes**.
2. Tap your name > **Switch to student view**, open the event.

You should see: *Event updated.* On your own event the button says **Your event** (grey). Switch back to the organizer view afterwards.

☐ OK ☐ Problem, what happened: _____

Test 15 - Check in a guest with the scanner (needs a second phone or a computer screen)

1. As **Admin**, switch to student view and register for Big Test Event 2. Open **My Tickets**, tap the QR code so it is big.
2. **Second phone:** sign in there as Test Student. **One phone only:** take a screenshot of the big QR, send it to your computer (e.g. WhatsApp Web) and open it on the computer screen. Then sign in as Test Student on your phone.
3. As Test Student: **Scanner** > choose **Big Test Event 2** at the top > point the camera at the QR.
4. Scan the same QR a second time.

You should see: first a green **Access granted** with the name; the second time it says the guest **was already checked in**. The Admin's ticket then shows **CHECKED IN** (refresh My Tickets).

☐ OK ☐ Problem, what happened: _____

Part 5 - Notifications

Push messages go to the account that is **signed in on the phone**. Messages for other accounts are still waiting in their **bell** when you sign in as them.

Test 16 - Allow push messages

1. Sign in as **Test Student**. If Android asks to allow notifications, tap **Allow**.
2. **Profile** > the **Notifications** card.

You should see: the card says *Push messages are on for this device.* (If it says blocked: phone Settings > Apps > UniHub > Notifications > on.)

☐ OK ☐ Problem, what happened: _____

Test 17 - Waitlist: a seat opens up

1. As **Test Student** (organizer view): create an event `Tiny Event` starting tomorrow, capacity `1`, public.
2. Sign in as **Admin** > student view > register for Tiny Event (you get the seat).
3. Create **Student 2** (`whp2718+student2@gmail.com`) and register for Tiny Event.
4. Student 2 sees **Waitlisted**; in My Tickets: **ON WAITLIST**.
5. Sign in as **Admin** > My Tickets > **Cancel registration** on Tiny Event.
6. Sign in as **Student 2** and tap the **bell**.

You should see: a notification **You got a spot!**; Student 2's My Tickets now has a real ticket with a QR code.

☐ OK ☐ Problem, what happened: _____

Test 18 - Event changed / cancelled messages

1. Student 2 is registered for Tiny Event. Sign in as **Test Student**, edit Tiny Event and change the time.
2. Then edit it again > **Cancel event** > **Yes, cancel event**.
3. Sign in as **Student 2** and open the bell.

You should see: Event updated and **Event cancelled**; the ticket in My Tickets is marked cancelled.

☐ OK ☐ Problem, what happened: _____

Test 19 - Removing notifications

1. Still in the bell list: swipe one notification to the left or right.
2. Tap the **bin icon** at the top > **Delete all**.

You should see: the swiped one disappears; after Delete all the list shows a drawn picture with *No notifications yet.* Close and reopen: they stay gone.

☐ OK ☐ Problem, what happened: _____

Test 20 - Reminder push (leave the phone signed in)

1. As **Test Student** register for an event (made by someone else) that starts in 3 to 20 hours.
2. Stay signed in as Test Student. Wait a bit more than 1 hour.

You should see: a push message **Reminder**: *... starts in N hours.*

☐ OK ☐ Problem, what happened: _____

Test 21 - 'Are you still coming?' (wait 12+ hours, or ask Claude to speed it up)

1. As **Test Student** register for an event (made by someone else) that starts in about **2 days**.
2. Stay signed in. About 12 hours later a push **Still coming?** arrives.
3. Open **My Tickets**: a card **Are you still coming?** sits above the ticket. Tap **Yes, I'm coming**.

You should see: *Thanks! Your seat is confirmed.* and a green **Confirmed** badge on the ticket. (**I can't come** asks first, then frees the seat.)

☐ OK ☐ Problem, what happened: _____

> **Tip:** Don't want to wait 12 hours? Tell me which event, and I can move the registration back in time so the question arrives within 10 minutes.

Part 6 - After the event: past tickets, reviews, statistics

For these you need an event that has already started and ended. Create a short one now:

Test 22 - A short event that ends soon

1. As **Test Student** (organizer view): create `Quick Event`. **Starts**: 5 minutes from now. **Ends**: 20 minutes from now. Turn **Require QR Code Check-in** off and leave **Allow User Reviews** on.
2. Sign in as **Student 2** and register for Quick Event.
3. Wait until it has ended (about 20 minutes).

You should see: Quick Event is published and Student 2 has a ticket.

☐ OK ☐ Problem, what happened: _____

Test 23 - Past tickets fold away

1. As **Student 2** open **My Tickets** after Quick Event has ended.
2. Scroll down to **Past events (1)** and tap it.

You should see: upcoming tickets stay on top; Quick Event is now a small card in the folded **Past events** section with **ENDED** and a **Leave Review** button.

☐ OK ☐ Problem, what happened: _____

Test 24 - Leave a review

1. Tap **Leave Review**, give 4 stars and a comment, tick the box that you attended, submit.

You should see: a green message; the card now shows a gold star instead of the button (you can review once).

☐ OK ☐ Problem, what happened: _____

Test 25 - Organizer statistics

1. Sign in as **Test Student** > **Dashboard**.
2. Scroll down slowly. The top part (university name and **Event Analytics**) must stay solid: the cards slide **under** it, never through it - in light and dark mode.
3. In **Registered, confirmed and came** each event has labelled rows **Registered**, **Confirmed**, **Came** with a number at the end. Events without sign-ups say *No sign-ups yet*; open events say *Came: not counted*.
4. Tap an event (or a card under **Attendance by event**).

You should see: the **Event statistics** page: number tiles, labelled attendance bars, **Sign-ups per day** and, for Quick Event, the **Ratings** with Student 2's 4 stars.

☐ OK ☐ Problem, what happened: _____

Part 7 - Admin tools

Sign in as **Admin** for this part.

Test 26 - Reporting an event and handling the report

1. As **Student 2**: open an event made by Test Student > **three dots** (top right) > **Report event** > **Spam or advertising**, type `test report` > **Send report**.
2. Sign in as **Admin** > **Admin** > **Reports (1)**.
3. Tap **Dismiss** > **Dismiss**.

You should see: the report shows the event, reason and text; afterwards it says **Dismissed** and the event stays online.

☐ OK ☐ Problem, what happened: _____

> **Warning: Remove event** cancels an event for everyone and can't be undone. Only try it on an event you made just for testing.

Test 27 - Change someone's role

1. **Admin** > **Users**. Search `Student 2`.
2. Tap the **person-with-gear icon** on the card > **University organizer**. Then set it back to **Student**.
3. Find your own card.

You should see: the role line changes each time. Your own card has no gear icon (you can't lock yourself out).

☐ OK ☐ Problem, what happened: _____

Test 28 - Remove a user, with photo and block

1. Create `whp2718+gone1@gmail.com` (name `Gone One`). As Admin give it the role **Commercial planner**.
2. Sign in as Gone One > **Profile** > add a profile photo. Create one public event and publish it.
3. Sign in as **Admin** > **Users** > gear icon on Gone One > **Remove user** (red).
4. Read the dialog: it says **1 event** will be deleted too. Tick **Block this email address ...** and tap **Remove user**.

You should see: *Gone One was removed*; the person and the event are gone from the lists. Tell me when you did this test and I will check that the photo file was deleted on the server too.

☐ OK ☐ Problem, what happened: _____

Test 29 - A blocked address cannot sign up

1. Sign out. Try to sign up again with `whp2718+gone1@gmail.com`.

You should see: a message that this email address can't be used to sign up.

☐ OK ☐ Problem, what happened: _____

Test 30 - Unblock an address

1. Sign in as **Admin** > **Users** > **Blocked addresses** (under the search box).
2. The list shows whp2718+gone1@gmail.com with the date and your name. Tap **Unblock** > **Unblock**.
3. Sign out and sign up with `whp2718+gone1@gmail.com` again.

You should see: *... is unblocked*, the list is empty, and the sign-up works (a brand-new, empty account).

☐ OK ☐ Problem, what happened: _____

Test 31 - Unconfirmed label and safety rules

1. Start a sign-up with `whp2718+gone2@gmail.com` but don't enter the code.
2. Within 20 minutes, as **Admin** > **Users**, find it.
3. Open the gear menu on an **admin** account (if there is another one).

You should see: the new account shows an orange **Email not confirmed**. Admin accounts have no **Remove user** item (they must be made a normal user first).

☐ OK ☐ Problem, what happened: _____

Part 8 - Profile, looks and deleting an account

Test 32 - Profile basics

1. **Profile** > **Edit name**, change it, **Save**.
2. **Change password** (then change it back or write it down).
3. **Language** > **Deutsch**. Look around, then switch back to **English**. Close and reopen the app.

You should see: *Saved.*, *Password changed.*; the app turns German and back; the language is kept after reopening.

☐ OK ☐ Problem, what happened: _____

Test 33 - Light, dark and wallpapers

1. **Profile**: switch between **Light**, **Dark** and **System**.
2. Pick a few **wallpapers** (Waves, Aurora, ...) and look at Home and the Dashboard.
3. In dark mode open My Tickets and an event page.

You should see: light mode is calm and white; dark mode is near-black with neon-green buttons. Text is readable everywhere and nothing overlaps.

☐ OK ☐ Problem, what happened: _____

Test 34 - App icon, splash screen and calm motion

1. Look at the UniHub icon on your home screen. Close the app completely and open it.
2. Switch your phone to dark mode and open the app again.
3. Phone Settings > Accessibility > turn on **Remove animations** (the name differs per phone). Open the app, register for something. Turn it off again afterwards.

You should see: a blue icon with a white U and a green dot; a blue splash screen (near-black in dark mode). With animations removed, no confetti and no fading.

☐ OK ☐ Problem, what happened: _____

Test 35 - Delete your own account (Throwaway)

1. Create `whp2718+gone3@gmail.com`. Register for one event.
2. **Profile** > scroll to the bottom > **Delete account**. Type `DELETE` > **Delete forever**.
3. Try to sign in with that email.

You should see: you are signed out; signing in says *Wrong email or password*. (An account that still owns events gets a message to ask an admin instead.)

☐ OK ☐ Problem, what happened: _____

Part 9 - If something goes wrong

Find what you see in the left column. If it isn't there, send me: the test number, what you tapped and a screenshot.

What you see	What to do
Phone says *App not installed*	Uninstall the old UniHub (long-press the icon > Uninstall), then install again.
Phone blocks the install	Tap **Install anyway** and allow installs from the Files app.
No code email arrives	Wait 2 minutes and check spam. You can ask for a new code once a minute. If you waited more than 20 minutes, just sign up again (Test 2).
That code is wrong or has expired	Use the newest email only. Tap **Resend code**.
This email address can't be used to sign up	An admin blocked it. Unblock it in Admin > Users > Blocked addresses (Test 30).
Events don't load / *Could not load*	Check the phone's internet, pull down to refresh, or close and reopen the app.
No push messages	Profile > Notifications card. If it says blocked: phone Settings > Apps > UniHub > Notifications > on. Remember: push goes only to the account signed in on this phone.
Scanner shows a black screen	Camera permission: phone Settings > Apps > UniHub > Permissions > Camera > Allow.
Scanner says *not allowed to scan*	Only the organizer of that event can check people in.
Leave Review is grey	The event hasn't started yet, it needs a QR check-in first, or you already reviewed it.
Remove user says it failed	Check the internet and try again. Admins can't be removed until their role is changed to a normal user.
You still own events when deleting your account	Use a fresh Throwaway account, or ask an admin to remove the account (Test 28).
Admin tab is missing	Only admin accounts have it, in the organizer view: tap your name > **Switch to organizer view**.
Poster upload refused	Use a JPG, PNG or WebP photo under 5 MB.

Words explained

Word	Meaning
Organizer	An approved account that may publish events and check guests in.
Waitlist	A queue for full events. People move up automatically when someone cancels.
Push message	A notification that pops up on the phone even when the app is closed.
Platform admin	Can manage everything: requests, reports and all users. University admins only manage their own university.
